

BLEPHAROPLASTY

HEMOCARE PRODUCTS

- Sebuwash
- AVST Moisturiser 1
- Antioxidant & Peptide eye gel

DIRECTIONS FOR USE:

PRE-OP: minimum 3 weeks preparation, maximum 3 months for best outcome

Morning & Evening:

- Apply and massage one pump of Antioxidant & Peptide Eye Gel to the whole eye area and areas where incisions will be made

POST-OP: Ask your medical specialist how soon application could proceed after surgery.

Morning & Evening:

- Mix a small amount of Sebuwash with water and gently cleanse the treatment area and surrounding areas.
- Apply and massage one pump of Antioxidant & Peptide Eye Gel to the whole eye area and areas where incisions have been made followed by AVST Moisturiser 1

NB: In case of aspirin allergy, use Low Foam Cleansing Gel instead.

For best outcome and maintenance of results , the combination of products could be used indefinitely.
